DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Dandy Hall is located on the northwest corner of Liberty Street and Water Street in Centreville. It is a two story frame building with a pitched gable roof, two story open porch on the front facade, facing Liberty Street, and a two story frame lean-to addition to the rear.

The first floor of the front facade is primarily a store front, with large shop windows flanking a recessed entrance door. A second door at the north end of this facade opens into a narrow stair hall leading up to a second floor apartment. The latter entrance has a paneled Victorian door with a two-light transom above. On the second floor, there is a door opening onto the upper porch, with one large 4/4 window to the left of the door and two to the right. The porch is supported by square posts with simple molded bases and caps. The first floor posts rest on high concrete supports. The second floor porch is enclosed with a plain ballustrade.

On the south gable of the original section, there are 2/2 windows flanking a flush brick

7.1 DESCRIPTION

stove chimney on the first floor, a 2/2 to the left of the chimney on the second floor and a 4/4 to the right, and a pair of louvered vents in the upper gable. A pair of "transom" windows between the first and second floor do not line up with the other openings. There is a single paneled door at the extreme left side on the first floor. The rear lean-to is only one bay wide, with a door on the first floor and a 2/2 window on the second floor.

The north gable has asymmetrical fenestration, with all of the openings shifted toward the rear of the building, in large part due to the stair hall. On the first floor, there is a small six-light sash near the center and a 6/6 window to the rear. On the second floor there is a six-light sash near the center and two 6/6 windows to the rear. A louvered vent in the upper gable replaced an earlier semi-circular vent.

The exterior is covered with a variety of siding materials. The north gable is covered with vertical board and batten, the south gable with asbestos shingle. The first floor of the front facade has plain horizontal weatherboard siding, the second floor is covered with German siding. The eaves are boxed in

and finished with a crown mold. The tin roof is applied over earlier wood shingles. The interior has been completely renovated numerous times over the years.
